

ENVIRONMENTAL SCIENCE (MINOR)

The Minor in Environmental Science provides students with an interdisciplinary understanding of natural systems, human impacts on the environment, and strategies for sustainable resource management.

The program integrates coursework from the physical, biological, and environmental sciences to examine environmental challenges such as climate change, pollution, and biodiversity loss. Through a combination of classroom instruction, laboratory work, field experiences, and applied projects, students develop scientific literacy, analytical skills, and problem-solving abilities relevant to environmental and sustainability-related careers.

The Environmental Science minor is well suited for students interested in careers or graduate study in environmental science, environmental management, public health, conservation, sustainability, policy, education, and related fields.

To complete the minor, students must earn 15-18 credit hours as follows:

Code	Title	Hours
Required Courses		9
ENVS 4100	Renewable Energy & Society	3
ENVS 4905	Undergrad Research Env Sci	1-3
GEOL 3603	Environmental Geology	3
Select two of the following:		6-10
STEM 2600	Energy & Alt Fuels	
ENVS 3000	Env Monitorin & Restoration	
BIOL 3500	Ecology	
BIOL 3510	Conservation Biology	

All courses applied to the minor must be completed with a grade of C or better.
